Summary

Proactive Student with superior skills in programming and communication. Eager to bring value to any industry establishment through hard work and commitment to quality.

Skills

- Microsoft Office suite
 - Strong oral communication skills.
 - Experience with diverse groups and populations.
 - Fast learner.
 - Graphic design (Adobe Photoshop & Illustrator)
 - Knowledge of Linux OS
- Programming Languages and Frameworks:
- Python, Django, C++, Java, PHP, HTML, CSS, JavaScript, SQL, .NET, React, React Native, Flutter

Projects

Hotspot Alert(React + Django)

Hotspot Alert is a Community-based web application developed for Jamaican citizens that allow users to post and expose information regarding criminal activities. The users of the system can post these activities anonymously without the fear of victim-blaming or bystanders' lives being put at risk. The system allows information about perpetrators conducting such crimes to be posted instantly and widespread through the Community Policing platform.

Epidemic Response Management System(React + Django)

This system was designed for managing epidemics/pandemics such as COVID. The main function of the system was to aid in speeding up the registrations process for testing and vaccination for Jamaican citizens. The system was also designed to combat the mismanagement of the vaccines inventory of the country by automating the update of the inventory records. Fast verification of testing and vaccination records was achieved by using QR codes that could be presented to any business that may require proof of such records.

Spatial Virtual Link Up(React + Node JS)

This application was created for the department of Information Technology at University of the Commonwealth Caribbean. The application was used to host a virtual meeting with spatial voice chat capability hosting 30+ people.

Education

Bachelor of Science: Information Technology

Sep 2018 – Expected Jun 2022

University of The Commonwealth Caribbean; Current GPA: 3.50

Leadership

Vice President – UCC IT Club

- Presides at meetings in the absence of the president.
- Taught several programming languages and concepts.

Achievements

First place winner of Byte the Pi Caribbean Hackathon(2021)
